

Project Purpose:

The purpose of this project is to improve safety and traffic operations at the intersection of State Route 41 and State Route 49 in Madera County. This intersection lies at the heart of a rapidly growing business district in Oakhurst, along one of the primary routes to Yosemite National Park.

This project will improve safety by installing permanent traffic signals with lighting and construction of additional turn lanes at this location.

Description:

The project proposes to make improvements at the intersection of State Route 41 and State Route 49. This area forms a T-intersection and will include signalization, highway lighting, rehabilitation and shoulder improvements which will include improvements at both state routes designated as 2-lane conventional highways at the intersection of State Route 41 and State Route 49 in the city of Oakhurst.

Construction Cost: \$1.2 Million

Timelines/Schedules:

Begin Construction: April 2006

End Construction: Summer 2006
